# LEDStar 24K-HL

## Hydraulic Legs

#### **LED** mobile lighting tower

Briteforce's standard LED mine specification light tower is available in two models LEDstar 2.4K-HL (hydraulic legs) and LEDstar 2.4K-ML (manual legs), both units provide 2400W of LED lighting. Built to cope with the toughest conditions. The LEDstar 2.4K series weighs less than 2 tonnes per tower, which means it can be towed by any on site vehicle.

The hydraulically/electrically operated light towers reach a maximum height of 10.2 metres with light bar tilt of 110° and rotation of 350°, all controlled from the ground. One-man operation of both tower and lights significantly reduces the likelihood of handling injuries when compared to manual control.

350° light bar rotation.
